

97 Multiple warning lights illuminated; communication error DTCs

97 13 37 2034945/1 August 8, 2013.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment
Q7	2010 - 2014	All	ΝΑ

Condition

- The customer may report two or more of the following warning lights are/were illuminated simultaneously:
 - Airbag warning light
 - TPMS warning light
 - ABS/ESP warning light
 - Engine warning light
 - Suspension warning light
 - Transmission warning light
- The warning lights may be sporadic, and may not be illuminated by the time the customer brings the vehicle to the workshop.
- CAN communication DTCs may be found in the following control modules:
 - Engine control module (address word 01)
 - Transmission control module (address word 02)
 - ABS control module (address word 03)
 - Adaptive air suspension control module (address word 34)
 - Corner view (front, rear) camera system control module (address word 6C)

Technical Background

There is sporadic data disruption on the CAN bus wiring behind the dashboard, between the left (T46a) and right (T46b) 46-pin CAN disconnect plugs.

For wiring and component reference, see *Elsa* >> *Wiring Diagrams/Component Locations* >> *Wiring Diagrams* >> *CAN disconnect plug, from June 2006.*

Technical Service Bulletin

Production Solution

Vehicle production will have continuous quality improvement.

Service

- 1. Upload GFF paperless log showing communication DTCs as described in the complaint.
- 2. Overlay new CAN twisted pair wiring behind the dashboard, between the two 46-pin CAN disconnect plugs (T46a/1H <-> T46b/1H and T46a/1L <-> T46b/1L).

Tip: Protect twisted pair with loom and abrasion resistant cloth. Beware of any moving parts behind dash panel that may chafe the wiring overlay.

Tip: For easier routing of overlay, removal of parts such as the glove box, air vents, and instrument cluster will aid in secure wire routing.

3. Replace the terminals with the VAS1978B repair kit.
