Q5	2013		
S5	2013		

## Condition

REVISION HISTORY		
Revision	Date	Purpose
2	-	Revised header data (Corrected model codes)
1	5/2/2013	Initial publication

- MIL on.
- A cylinder misfire fault (**DTC P0301 – P0306**) with **DTC P130A** is stored in the engine control module (ECM), J623 (address word 01).

## Technical Background

Not applicable.

## Production Solution

No changes in production have been made, as no issues have been identified.

# Technical Service Bulletin

---

## Service

Audi of America is requesting your cooperation in supplying us with technical information regarding this condition.

1. Verify that for **one** of the 6 cylinders, a misfire fault (**DTC P0301 - P0306**) is stored in ECM memory **with** the cylinder deactivation fault, **DTC P130A**. Also verify that the misfire is still active (after restart, misfire continues).
2. Contact a TAC consultant before proceeding. Do **not** delete the DTCs.
3. Attach the DTC and diagnostic log to the TAC ticket.

## Warranty

This TSB is informational only and not applicable to any Audi warranty.

## Additional Information

All parts and service references provided in this TSB (2033768) are subject to change and/or removal. Always check with your Parts Department and service manuals for the latest information.
