2012-2013 Passat TDI – AdBlue Level Reset Procedure

February 15, 2013: Update to information.

To reset the AdBlue level indicator after filling, use Guided Fault Finding Function/Component selection to perform the SCR system functions test plan, available under Drivetrain > 01 – CKRA – Engine –J623 > 01- systems capable of self-diagnosis > 01 – Diesel-direct fuel inj. and glow plug system EDC 17 > 01 – Engine electronics functions. After starting test plan, make selection to "Set reducing agent fill level to full".

If SCR related faults were stored in ECM before AdBlue tank was refilled, it may be necessary to complete a service regeneration to shut off AdBlue level indicator.
