## 2012-2013 Passat TDI – AdBlue Level Reset Procedure

**February 1, 2013: Update to information.**

To reset the AdBlue level indicator after filling, use Guided Fault Finding Function/Component selection to perform the SCR system functions test plan, available under Drivetrain > 01 – CKRA – Engine –J623 > 01-systems capable of self-diagnosis > 01 – Diesel-direct fuel inj. and glow plug system EDC 17 > 01 – Engine electronics functions. After starting test plan, make selection to "Set reducing agent fill level to full". **Once test plan completes, cycle key, reset readiness, and road test vehicle until AdBlue level indicator goes out (approximately 5 minutes).**
