Title: Disable Cummins Icon

Applies To: All Cummins powered units with Icon installed.

DESCRIPTION

Customer or dealer wishes to disable ICON system

RESOLUTION or SERVICE PROCEDURE

For 9000i Series:

1. Remove wire 17ED at the Icon module pin 6 and splice to 17 key switch power
2. Remove wire 97EM from Icon module and route to key switch power. Protect with 5 amp fuse. **[Power only when the key is on]**
3. Move wire 13 on the IGN. relay from 87A to 87 and leave 97EN disconnected.
4. Locate relay 1217 and cut wire 17EF. Take the relay side of the circuit and run it too a good ground source. Then take the module side of the circuit 17EF and tap into an ignition source like circuit 17. **[This supplies the ECM power to pin 39]**
5. Remove wire 17EE from the Icon module 1213 connector pin 5 and connect to a good ground.

For Prostar/Lonestar Series:

1. Remove 595ANZ from DLB and program the body controller. Then remove the un-switched battery power to the ICON module.
