Parking brake adjustment method		USA
Service Category	Section	
Brake	Parking Brake	
Applicability		
2013, 2014MY GS350		

APPLICABLE VEHICLES

2013-2014	GS350
-----------	-------

CONDITION

The '13-'14MY GS 350 comes equipped with an electronic Rear Parking Brake. The adjustment method is different from the previous generation GS model which had a mechanical parking brake. Because of this, a different procedure is required when performing adjustments. If the incorrect adjustment procedure is performed, this may adversely affect the performance of the parking brake including possibility of causing a noise when the vehicle travels over bumps (i.e. rattle).

RECOMMENDATIONS

Please refer to the repair manual "Parking brake system adjustment" section for proper methods and procedures.
Repair procedure and content is different from the previous model.
