## SHORT PIN INSTALLATION

To minimize battery discharge the Short Pin has been removed and is stored in the engine compartment Relay Block. Install the Short Pin and confirm all related DTCs are cleared.

### DTC Clearing Procedure

1. Connect Techstream.
2. Cycle the ignition switch to the "IG-ON" position.
3. Using Techstream, check any other codes being output.
4. Erase DTCs (B1650 & B1794) and Freeze Frame Data.

#### NOTE

If any DTCs besides B1650 & B1794 appear, repair the applicable system according to the Repair Manual.

- 1 Install Short Pin Here  
2 Remove This Short Pin

## TPWS ACTIVATION & INITIALIZATION

### Activation Procedure

1. Connect Techstream.
2. Cycle the IG switch to the "IG-ON" position and check that the Low Tire Pressure Warning Light blinks for 1 minute and then remains illuminated.
3. Press or remove the valve core to reduce the tire inflation pressure rapidly by 6 psi (0.4 kgf/cm<sup>2</sup>, 40 kPa), or more, within 30 seconds.
4. Check that the Low Tire Pressure Warning Light goes OFF after all the TPWS sensors are activated.

#### NOTE

To adjust the tire pressure correctly when the outside temperature is significantly colder than shop temperature, perform a Health Check using Techstream and select the "Compensation Tire Pressure" checkbox. Compensation pressures will be displayed on the Health Check results screen. Adjust the tire pressure when the tires are cold.

5. Using Techstream, check for DTCs (C2111-C2114). If no DTCs are stored, continue to Initialization Procedure. If these DTCs are stored, repeat step 3.

### Initialization Procedure

Refer to the Repair Manual for the [Initialization procedure](#). Please note the spare tire does not have a TPWS sensor.

## FRONT LICENSE PLATE & MOUNTING BRACKET INSTALLATION

For states that require a front license plate, please install per this procedure. The bracket and self-tapping screws are stored in the luggage compartment.

### Installation Procedure

1. Align holes "A" of the mounting bracket with the dimples on the radiator lower grill. Mark the locations of holes "B" on the radiator lower grill.

#### NOTE

Holes "A" are used for the installation of the mounting bracket to the radiator lower grill.  
Holes "B" are used for the installation of the front license plate to the mounting bracket.

2. Align holes "A" of the mounting bracket with the dimples on the radiator lower grill. Mark the locations of holes "B" on the radiator lower grill.

#### NOTICE

Do NOT drill into the dimples of the radiator lower grill.

3. Drill 2 relief holes with a diameter of 11 mm (0.43 in.) at holes "B" on the radiator lower grill. This will prevent the license plate retaining bolt ends from contacting the grill.
4. Install the mounting bracket to the radiator lower grill using the 2 self-tapping screws provided.
5. Install the front license plate to the mounting bracket using 2 non-corroding bolts with the following dimensions.

**Nominal Length: 15.0 mm (0.59 in.)**

**Diameter: 6.0 mm (0.24 in.)**

- 1 Mounting Bracket  
2 Mark and Drill Holes  
3 Dimples  
4 Screw

- 1 Front License Plate  
2 Bolts
