Brake

Section

Parking Brake

Applicability

2014 Camry and Avalon

APPLICABLE VEHICLES

2014	Camry	2014	Avalon
2014	Avalon HV	2014	Camry HV

CONDITION

Some 2014 Camry, Camry HV, Avalon and Avalon HV vehicles may exhibit a parking brake adjustment condition at one or both rear wheels.

RECOMMENDATIONS

This issue is currently under investigation. Please verify the following:

- 1) Measure the parking brake pedal adjustment using the SST 09709-00002 and confirm pedal adjustment is correct (7-10 clicks at 300N).
- 2) Move the parking brake cable #2 and #3 between each of the body clamps up to the rear brake backing plate to remove any internal binding in the cable(s).
- 3) Cycle the parking brake pedal 5 times.

If the parking brake pedal adjustment is within specifications and the condition is still present after performing steps 2) and 3), contact TAS for further instructions.
