2013-2014	LX570		

CONDITION

iTunes Radio is a new feature for iPhone 4, 4S, 5, 5S, and 5C running iOS 7 or later. This feature does work with the in-vehicle audio system either via Bluetooth or by USB cable. Details on how to access this feature are described below.

RECOMMENDATIONS

To use iTunes Radio via the USB cable connect USB cable to USB port and to iPhone, audio/navigation system will change to iPod mode. On the navigation/radio screen do the following:

- 1) Choose Browse
- 2) Choose Playlists
- 3) Choose the desired iTunes Radio station
- 4) Next screen will show 2 tracks "iTunes-Radio-1" and "iTunes-Radio-2". Selecting either one will begin iTunes Radio.

For navigation type systems, to use iTunes Radio via Bluetooth change to Bluetooth Audio mode on the navigation screen and do the following:

- 1) Choose Album Icon
- 2) Choose Playlists
- 3) Choose the name of the iTunes Radio station desired.

In the event where iTunes Radio will not play through the vehicle, confirm that the iPhone has at least one song on it. Some navigation systems/radios require at least one song on the iPhone to enable music to be played.
