2007-2014	Camry HV	2001-2014	Corolla

**CONDITION**

The customer is having difficulty changing the multi-display screen from Day Mode.

If the multi-display screen is set to Day Mode when the headlights are on, the setting will be memorized when the engine is turned off. When the customer is driving the vehicle at night, and the instrument panel light control knob is turned fully to the right, the Day Mode button will not appear on the multi-display screen.

**RECOMMENDATIONS**

Follow the procedure below to turn the Day Mode off.

1. Confirm that the instrument panel control knob is in the middle position, the headlights are on, and the solar sensor is covered if it is daytime.
2. Push Display button on the multi-display assembly.
3. Touch the Day Mode button on the screen.
