Introduction

Lexus models equipped with the Premium HDD Navigation (EMV-N) System require a Special Service Tool (SST) USB drive to update the map, points of interest, Gracenote®, and system software. The SST is used with all vehicles to deliver the update, however a unique Activation Number is required for each vehicle. Activation Numbers are provided in an Activation Card Number (ACN) pamphlet available through the normal parts ordering system. Use the process described in this bulletin to perform the update.

NOTE

- Gracenote® information must be updated at the same time as Map Data. This data is included on the Map Data SST.
- Map data will be released annually through the shipment of a USB Drive SST to each dealer. The SST must be stored in the SST cabinet to ensure it can be easily found.

Parts Information

CURRENT PART NUMBER	PART NAME	QTY
PT219-HDD07-00	ACN Nav Update 11 CY (pamphlet)	1

NOTE

Pamphlet is green, with Lexus and Denso labels on the front cover.
