

No.: 13 CSA-1
February 1, 2013

TO: Service Locations

FROM: Systems Support Development

SUBJECT: **Release of DDDL and DDRS 7.09 Service Pack 2**

SUBJECT DETAIL

On Thursday, February 7, 2013, Service Pack (SP) 2 for Detroit Diesel Diagnostic Link (DDDL) and Detroit Diesel Reprogramming Software (DDRS) version 7.09 will be made available to download from the Detroit Diesel server. This service pack will support the following:

- Additional support for GHG14 MCM21T/ACM21T/CPC04T software versions M2.1.0.47/E3.1.0.48/R31_00_000a
- Fault code troubleshooting added
- Update Odometer option added
- Address general fixes

IMPORTANT NOTE for DDRS users: ECU software versions listed above cannot be downloaded in older versions of DDRS. Users will be prompted with an error, preventing the download, if the calibration is newer than what DDRS versions 7.08 or older can process. This is to prevent calibrations incompatible with the service tool from attempting module programming, which can render a vehicle inoperable.

In September of 2012, the DDRS 7.09 software tool was released to our service network. In order to maintain access to the Detroit Diesel server data, all Master Reprogramming Stations must be kept updated with the current version of DDRS software to avoid any interruptions.

Please refer to [12 CSA-21](#) for ordering information and instructions.

UPDATE INSTRUCTIONS

For DDRS users:

NOTE: Users who are not at version 7.09 of DDRS or DDDL must update their prior versions to this software.

SP1 will automatically be downloaded when you connect to the DDC server. Please do the following:

1. Open DDRS 7.09.
2. Select Program Device.
3. Click on Connect to Server.
4. Enter your password.
5. Apply the patch when prompted.

For DDDL users:

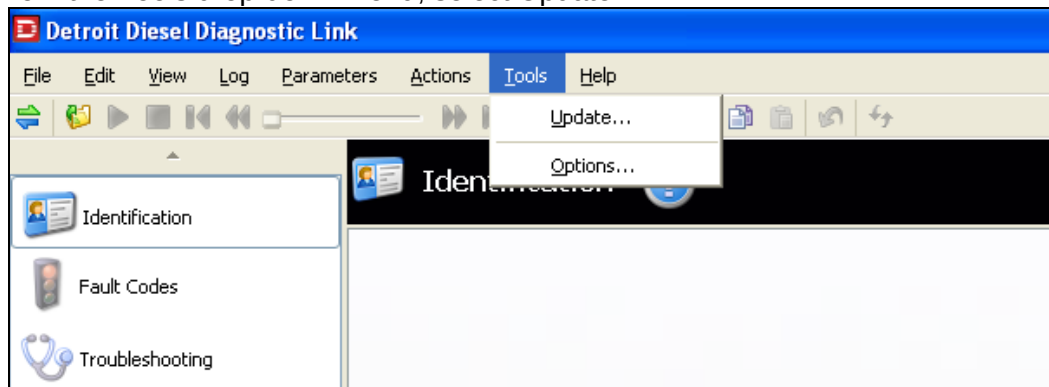

There are two methods of obtaining SP2. The preferred update method is through the DDDL 7.09 software, outlined below. If you are not able to connect to the Detroit Diesel server via DDDL, this service pack can be downloaded from **DDCSN.com**.

NOTE: Prior to opening DDDL, make sure you have established an Internet connection. A high speed connection is recommended and will result in faster update rates.

NOTE: You must have DDDL 7.09 installed on your computer prior to applying this patch.

NOTE: Users with earlier versions of DDDL must purchase and install version 7.09 before following the service pack procedure.

1. Open DDDL software.
2. From the Tools drop-down menu, select Update.

3. A screen will be displayed showing the progress of the download. Follow the installation prompts to complete the download.

4. Verify that the patch has been applied by selecting **About** from the **Help** dropdown menu. Verify the following:

Application Components

Detroit Diesel Diagnostic Link **07.09SP2-xxxxxx-xxxxxx**
