2 SPN 190/FMI 15 - GHG14

This diagnostic is typically an Engine Overspeed Pre-warning.

Check as follows:

SPN 190/FMI 15 is an information code only. It is used to provide the operator a message on the instrument cluster. The function is to warn the operator that the engine speed is getting high and the service brakes should be applied to avoid engine/transmission damage, typically on a steep grade deceleration. The code will self-delete with each ignition cycle. Driver should be questioned about vehicle driving conditions. Obtain a copy of DDEC reports and contact the Detroit Customer Support Center at 800-445-1980 for further instructions.

3 SPN 190/FMI 17 - GHG14

This diagnostic is typically an Engine Overspeed Pre-warning.

Check as follows:

SPN 190/FMI 17 is an information code only. It is used to provide the operator a message on the instrument cluster. The function is to warn the operator that the engine speed is getting high and the service brakes should be applied to avoid engine/transmission damage, typically on a steep grade deceleration. The code will self-delete with each ignition cycle. Driver should be questioned about vehicle driving conditions. Obtain a copy of DDEC reports and contact the Detroit Customer Support Center at 800-445-1980 for further instructions.
