Service Bulletin

Link 800M1300 Electronic Air Kit for Link® UltraRide® Chassis Air Suspension

To: Owners/Operators of Vehicle Equipped with Link 800M1300 Electronic Air Kit for Link UltraRideSuspension Systems

Subject: Upgrade replacement of earlier versions of the 800M1300 Electronic Air Kit for Link UltraRide Suspension

Date: February 7th, 2013

Description: Link Manufacturing, Ltd. has updated the programing and upgraded the circuit board in the ECU Air Control Unit of the 800M1300 electronic air kit. Some users have reported issues in which the Link UltraRide Chassis Air Suspension Air Kit does not maintain the proper ride height. Therefore Link has elected to replace the Air Control Unit as we are committed to maintaining our high standards of quality and product performance.

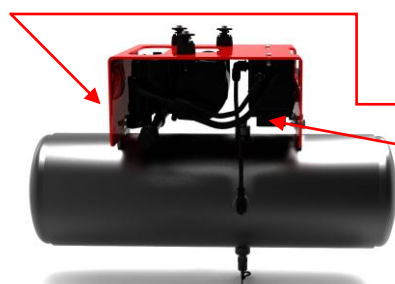

Units affected: Air Control Units covered by this bulletin are identified by serial numbers on the attached document.

Corrective action: The replacement of the Air Control Unit- part number 13010582 takes approximately 2hrs and should be done during your next service date for this vehicle. A Link representative will be contacting you to schedule a time to assist in the change out or if you would prefer to contact Link directly please call 800-222-6283 and ask for Chuck Boden or email to cboden@linkmfg.com.

Link Mfg. Ltd. regrets any inconvenience caused by this product update. Although you may not have experienced any problems with earlier versions of this air kit, we feel it best to proactively address the situation by replacing all the kits with the latest updates to avoid any future inconveniences.

Sincerely,

Larry Galloway
Inside Sales & Customer Service
Manager
Link Manufacturing, Ltd.

The serial number is located in two locations:

- 1) On the side of the metal housing by the compressor
- 2) On the end of the ECU housing
