**SUBJECT****Head-Up Display: M View Defaults to Standard View****MODEL**

F12

Produced from March 2012 to July 2012 with option ZTP (Technology Package)

**SITUATION**

After the vehicle was programmed with ISTA/P 2.47.1 or higher, the M view in the Head-Up Display (HUD) constantly defaults to the standard view after the ignition has been turned off and the vehicle has entered sleep mode (after approx. 16 minutes).

The customer must change the HUD setting back to M view every time the ignition is turned on again.

**CAUSE**

Concept change in the HUD through a software update introduced with ISTA/P 2.47.1 or higher

**INFORMATION****Do not replace any parts.**

Since this is part of the Head-Up Display concept change, it is normal operation after programming the vehicle with ISTA/P 2.47.1 or higher.

- From integration level: F010-12-07-531 or higher

**Note:** It is not possible to change the functionality of the Head-Up Display to how it performed before the software update.

**WARRANTY INFORMATION**

Not applicable.
