BMW Motorrad USA Parts Information Bulletin

Motorrad USA Chemicals
BMW Group

Subject: New Original BMW Motorrad Engine Oils and Gear Lubricants

BMW Motorrad USA is pleased to announce a new partnership with Castrol (BP Lubricants USA, Inc.). BMW Motorrad Original lubricants and engine oils are jointly developed and specifically formulated by Castrol and BMW to demanding and exact specifications for top performance and long service life of BMW engines and drive trains.

Since 2012, BMW Motorrad has re-aligned its recommendations globally to only two engine oils for all engine types:

- BMW Motorrad High Performance SAE 15W-50 - API SJ/JASO MA2
- BMW Motorrad 4T Racing SAE 5W-40 - API SL/JASO MA2

Recommendations in RSD (Repair and Service Data, BMW Motorrad) DVD, consumer repair manuals and Rider's Manuals will only list one of these two oils from 2012 onward.

Note: BMW Motorrad 4T Racing SAE 5W-40 is the same formulation as Castrol Power 1 Racing SAE 5W-40 listed in the BMW documentation but due to trademark restrictions the name could not be used in the U.S.

The BMW Motorrad High Performance 15W-50 and 4T Racing 5W-40 motorcycle engine oils offer BMW riders considerable benefits.

- Exclusive development for BMW that also satisfies the most exacting standards for lubricant products.
- Exceptional responsiveness and engine acceleration.
- Longer service life for the catalytic converter and engine.
- Fuel savings with improved performance and reduced harmful emissions compared to conventional engine oils.
- Lasting protection and engine performance between services.
- Satisfies the warranty requirements for BMW engines.

For customers of legacy motorcycles that prefer to continue using a mineral oil based product, BMW Motorrad has two weights that cover earlier engines and most temperature ranges:

- BMW Motorrad Performance SAE 10W-40 - API SG/JASO MA2
- BMW Motorrad Performance SAE 20W-50 - API SG/JASO MA2

2 gear oils offered by BMW Motorrad will be Castrol branded product and are aligned with Service Data recommendations in RSD (Repair and Service Data, BMW Motorrad) DVD

- Castrol GL-5, SAE 80W-90
- Castrol MTX 75W-140 Full synthetic

Castrol SAF-XO continues to be distributed in a BMW Group labeled bottle and is available in two sizes, 7 oz (200ml) for single fill of final drives and 1 quart.

The new Motorrad engine oils are available in quarts or bulk 55 gallon drums for BMW workshops. Minimum order quantity for engine oil quarts is 6 bottles and for gear oil 12 bottles (1 case).

Always reference the latest RSD DVD (Repair and Service Data, BMW Motorrad) for the correct filling quantities for engine, gearbox and rear-wheel drive oil changes.

Refer to SIB 00-003 2013 (010) for the current oil application chart and more information about approved oils.

Orders can be placed as usual via DCS and will be fulfilled by the virtual warehouse partner, Excelda, and the BMW Group Chemicals Program. Please reference parts bulletin, 71-21-2010 (061)5R for details and contact information.

BMW Motorrad Original Engine and Gear Lubricants

Description	Part number	Dealer net	MSRP
High Performance Engine Oil 15W-50 Quart	07 51 0 039 642	\$6.30	\$10.50
