2011-2013 Jetta, Tiguan, GTI, Golf and 2012-2013 Passat-Tire
Pressure Monitoring System

September 27, 2013: Update to Information.

The TPMS system on the MY vehicles listed above, is now an indirect type system. There are no sensors in the wheels as on previous models. There is no separate TPMS module, as all functions are part of the ABS module and monitored through the ABS sensors. [For more information on the system, see the May edition of Tech Talk on VwWebsource](#)
