| Topic number      | LI68.10-P-056727                         |
| Version           | 1                                        |
| Design group      | 68.10 Instrument panel                   |
| Date              | 07-09-2013                               |
| Validity          | Model series CLS (218), E (207), E (212) |
| Reason for change |                                          |
| Reason for block  |                                          |

### Complaint:

Glove box squeaks/rattles at top left mounting.

### Cause:

Glove box mounting hole in crossmember has sharp edges.

| Attachments |                       |
|-------------|-----------------------|
| File        | Designation           |
| Bild 1.JPG  | Hole with sharp edges |

### Remedy:

Attach thin layer of felt to mounting at top left of glove box.

| Attachments |                               |
|-------------|-------------------------------|
