

Run Smart

LED headlights now standard on Cascadia

What is happening?

LED headlights will become standard on all Cascadia and Cascadia Evolution models starting with the SpecPro update in August. See pricing letter issued on August 2nd, 2013.

Why this is happening?

Freightliner recognizes LED headlight technology offers enhanced safety and productivity, plus it further strengthens our position as a leader in safety, driving experience and lowest total cost of ownership.

Features & Benefits

Visibility: The LED beam pattern reduces eye-strain for drivers and minimizes harsh headlight glare to oncoming traffic. Nighttime visibility is superior resulting in improved object detection.

Improved life: This LED headlight will last approximately 50 times longer than traditional bulbs. The headlights underwent vigorous field testing in a variety of extreme weather conditions.

Lower electrical draw: Reduces draw on electrical system, freeing up power for other uses.

Retrofit: For previously built Cascadias, this headlight is available for retrofit.

LED High Beam

Incandescent High Beam

LED Low Beam

Incandescent Low Beam

SpecPro : 312-075 LED LOW BEAM AND HIGH BEAM HEADLIGHTS

****Please note the previous headlights are still available as an option in SpecPro.****
