Title	Dynamic Response Pipes Contacting Deployable Side Step Bracket
Category	Accessories
Last modified	17-Jul-2013 00:00:00
Symptom	General Accessories
Content	<p><u>Issue:</u></p> <p>When fitting the Deployable Side Steps the suspension Dynamic Response pipes can contact the Deployable Side Step bracket. This condition can give a knocking noise when the vehicle is in service.</p>
	<p><u>Action:</u></p> <p>If you notice the Dynamic Response Pipes touching the side step bracket the please order LR052713 (Rubber Buffer) which is to be fitted to the pipe to eliminate the touch condition between the pipe and the bracket.</p>
