Title	UPS Q323 – ABS Software Download fails
Category	Diagnostic Software Hardware
Last modified	07-Aug-2013 00:00:00
Symptom	000101 Diagnostic Concerns
Content	Issue: Land Rover dealers report that the ABS (Anti-Lock Brake System Control Module) Software Download fails on UPS Q323 Action: Before carrying out UPS Q323 - Start a new SDD (Symptom Driven Diagnostics) session - Follow the Workshop Procedure as given in UPS Q323 - If using VCM (Vehicle Communication Module) launch CAN link monitor and Debug monitor - If using DA Dongle, Mongoose or I-view, launch Debug monitor - Configuring existing module ABS - During the software download if you see an error message, take a screen shot - Following the error message stop CAN link monitor, stop and save Debug monitor - SDD close session and log out - Raise a TA if you experience any failures and attach correct session file, CAN link monitor, Debug monitor and screen shot
