DATE: 12/30/2013
CATEGORY: Navigation SD Card Update Program for 2013 Legacy and Outback

In appreciation for purchasing a Subaru vehicle **with navigation**, Subaru of America, Inc. (SOA) is offering owners of **2013 Legacy/Outback vehicles with Aha capability** a complimentary Navigation SD Card update with free installation. These owners will be receiving an email and a follow up direct mailer from SOA detailing that offer in early January 2014.

The procedure is very straightforward. Customers' will need to schedule an appointment with their dealership to swap out the Navi SD Card located in the slot on the headunit, as this procedure requires that a fuse be removed to prevent damage to the headunit. The entire procedure is quick and easy, at roughly 20 minutes, and SD cards can be available within 7 days of placing the order. Refer to **Service Bulletin: 15-169-13 Customer Satisfaction – Navigation SD Card Update Program for 2013 Legacy and Outback with Subaru Starlink™/Aha™** found on STIS.

Order the appropriate Update Kit part number as listed in the Service Bulletin just as you would any other part from your facing warehouse. Once received, set an appointment with the customer, and follow the Service Bulletin procedures to complete the installation of the new SD Card software/maps update

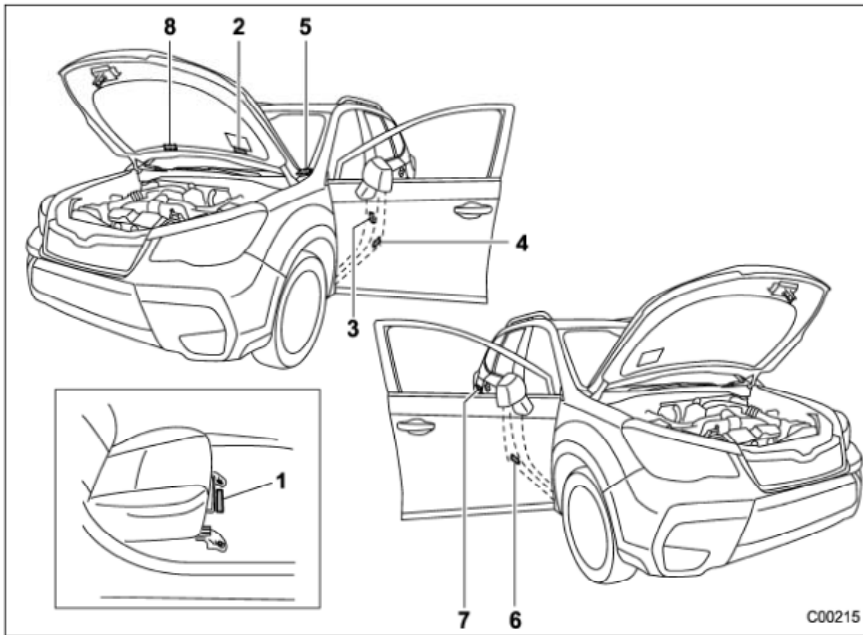

What specifically is being replaced when the Navi SD Card is upgraded? The navigation software itself in the car will be replaced with an updated version which has changes specifically designed to improve navigation functions and operations during daily driving. The improvements include following – and [click here for more program details and questions/answers](#):

- Navigation map screen has been cleaned up & simplified
- The timing of the Navigation turn announcement has been increased for earlier turn notification
- End-of-trip function & guidance has been simplified
