2005-2010 Jetta, 2006-2009 Rabbit, GTI – Clock Loses Time
June 28, 2013: Update to Applicability.

If some customers comment that the clock is **losing** time, do the following:

- 1) Verify the concern.
- 2) Set the clock to a reliable source at the dealership.
- 3) Have the customer return in 2-4 weeks to check the clock again.

If the clock has lost, on average, more than 4 minutes in a month, replace the instrument cluster.
