2012-2013 Routan SEL Vehicles – Start/Stop Button Installation at PDI

July 19, 2013: Update to Information.

New Routan SEL vehicles should be equipped with a start/stop button which is to be inserted into the WIN module during PDI. The button is shipped in the by-pack (found on the third row seat) as shown below.

Note:

The switch will not be functional until after the transport mode has been deactivated.
