## Feedback Corner

This week's feedback is from Josef regarding the 2009 Routan Repair Manual. He states:

"At the end of the test plan, it tells you what to do if 'yes' or 'no' and under 'yes', it says 'With the scan tool, select FCM under ECU selection then Miscellaneous Functions and restore vehicle configuration.' However, there is no restore Vehicle Configuration under the new wiTECH."

This feedback was reviewed by the Service Information team and changes were made to Elsa to resolve this issue. We really appreciate Josef sending in feedback to help improve the quality of the repair information.

## Tech Tips

91-13-06 TT - Equipped with RCD-510 Premium 8 Radio – Radio Switches to Bluetooth Audio without Input			
Model(s)	Year	Eng. Code	Trans. Code
Golf, GTI, Eos, Jetta, Jetta Sportwagen, Passat, Tiguan	2010–2013	All	All
Beetle	2012–2013	All	All

If the radio is switching to the Bluetooth audio selection whenever a paired phone makes any sound, such as typing or an incoming email or text message, check the BT-Audio Autoplay setting in the Media Setup menu as shown below. If BT-Audio Autoplay is on (checked), switch selection off and retest for concern. If radio software is 0016 or 0007, radio may require software update as per TB 91-13-05 (2031136) to allow BT-Audio Autoplay to switch off.

**55-13-01 TT - Rear Lid Does Not Open After Handle Replacement**

Model(s)	Year	Eng. Code	Trans. Code
Jetta Wagon	2001–2006	All	All
Touareg (without Rear View Camera)	2004–2008	All	All

If the rear lid handle is replaced with part number 1J0 827 566L, the microswitch from the original handle must be transferred to the new handle. If original microswitch is not available, microswitch part number 1J5 962 104 B should be ordered and installed.

<b>20-13-03 TT - In-Tank Fuel Pump Pressure Specified Value</b>			
Model(s)	Year	Eng. Code	Trans. Code
Tiguan	2009–2013	All	All

Specified fuel pump pressure value from the in-tank (low side) fuel pump is 3.7 bar or higher when tested.

Ensure fuel pressure is checked with a gauge that measures absolute fuel pressure such as the VAS 6550. If fuel pressure is checked with a gauge that measures relative fuel pressure, the gauge may incorrectly indicate pressure is below specified value.
