**2005-2013 All Vehicles with Bluetooth Phone Kit Installed – Streaming Audio from Phone to Radio**

**March 8, 2013: Update to Information.**

The streaming music feature on vehicles equipped with factory or dealer installed Bluetooth will be available only in certain instances. The vehicle must be equipped with the RCD 310 or RCD 510 (Premium 8) radios or the RNS 510 or RNS 315 navigation systems. The Bluetooth system must be either the UHV low (9W2), UHV-NAR (9W7 or 9ZR) factory installed systems or the Volk – L dealer installed system.

This feature is also phone dependent. A list of tested phones is available in TB 2022378 Bluetooth®, UHV Low (9W2) Overview (V910934) for the Volk-L and 9W2 systems and at [VW.com/Bluetooth](http://VW.com/Bluetooth) for the 9W7 and 9ZR systems.

Note: The UHV High (9W3) system does not have this functionality (See TB 2021523 Bluetooth®, UHV High (9W3) Overview (V910931)).
