Unsuccessful Car-Net™ Over The Air Registration (OTAR) during PDI

Car-Net™ LED will not illuminate green at PDI. Operating Control Unit (OCU/J949) will not perform a successful OTAR (Over The Air Registration).

Technical Background

⚠️**Note:**

Information ONLY applies to Passat vehicles with PR code "EL2 - Online services", within the specified VIN range above.

Adaptation value of some modules requires that 50km be placed on odometer before the Car-Net™ module (OCU/J949) will attempt to perform its OTAR and the LED to illuminate green. Pushing the **"i"** button in the 3-Button assembly will override the 50km requirement of OCU and allow the OTAR to take place.

Technical Bulletin

Production Solution

Adaptation value reduced to 5km on odometer before the Car-Net™ module (OCU/J949) will attempt to perform its OTAR and the LED to illuminate green.

Service

While performing standard PDI:

- Vehicle removed from transport mode
- Vehicle outside with a clear line of site to the sky
- Push the **"i"** button in the 3-Button assembly located in the overhead console (pre-recorded voice should be heard)
- Cycle ignition OFF then back ON
- Wait the necessary 5 minutes for LED to illuminate green

Tip:

If the LED is already Illuminated green, pushing the "i" button is NOT required and this TB does not apply.

Warranty

Information only.

Required Parts and Tools

No special tools required

No special parts required.
