Procedure:

• Verify the period of time the electric coolant fans continue to run after the vehicle ignition is switched off.

If the period verified is less than 15 minutes in gasoline engine applications, or less than 16 minutes in diesel engine applications, this is considered normal operation and the customer should be notified as such.

If the period verified is more than 15 minutes in gasoline engine applications, or more than 16 minutes in diesel engine applications, continue with diagnosis using GFF.
