Urgent

Subject: **Delivery Stop Update: 2013 760Li Engine Control Module Software**

To: BMW Dealer Principals, Sales Managers, Service Managers,

On March 15, a Delivery Stop was issued to correct a potential problem with the engine control module software on certain N74-equipped 2013 760Li vehicles. The vehicles included in the VIN list below must **not** be delivered until the programming has been completed.

Until updated ISTA/P software is available, vehicles can be programmed via a remote IRAP session. Submit a PuMA case with the subject "**2013 760Li Engine Control Module Software**" to set up an IRAP programming session. A Service Information bulletin with warranty information will be provided as soon as possible.
