FOR MAY 2013**

32230 2010 - 2014 Mustang Overhead Console Replacement, Equipped With Anti-Theft

When replacing the Overhead Console on 2010-2014 Mustang vehicles the Intrusion/Inclination Sensor must be configured. The Intrusion/Inclination Sensor is an integral component of the Overhead Console and is not serviced separately. Follow the instructions in Workshop Manual, Section 419-01A to upload the Body Control Module B (BCM-B) configuration information to the scan tool. This information must be downloaded back into the same BCM-B after installation of a new console and/or intrusion and inclination sensor in order to establish the correct configuration of the BCM-B into the new Intrusion/Inclination Sensor.
