FOR JUNE 2013**

32265 2014 Escape - Remote Function Actuator Module (RFA) - False DTCs B10C2:24, B10C4:24, B1372, B1367

Some 2014 Escape vehicles may generate false DTCs B10C2:24, B10C4:24, B1372, and B1367 in the Remote Function Actuator Module (RFA). These false DTCs have no impact on the function of the RFA and should be ignored. The rear unlock sensors have been deleted in production and the software is in the process of being updated. Do not perform any diagnostics or repairs, and do not replace the RFA or the rear unlock sensors for DTC B10C2:24, B10C4:24, B1372, and B1367 unless there are other DTC's or associated customer issues. If so, refer to Workshop Manual, Section 501-14B.
