32295 2010-2013 F-150 - IDS Error Message During Programmable Module Installation Of  
The Anti Lock Brake Module

2010-2013 F-150 vehicles may exhibit an IDS error message during Programmable Module Installation (PMI) of the Anti Lock Brake (ABS) module if the IDS session is started with a new ABS module connected. To correct this condition, unplug the ABS module and start a new IDS session. Follow the on screen prompts for ABS module PMI. Once PMI is selected, then connect the new ABS module and continue following the on screen prompts to complete the module programming process.
