44181 2011-2014 - F-Super Duty - 6.7L Diesel - Diagnostic Trouble Codes (DTC) P20C0
P20C1, P20C2, P20BA, P20BB, P20BC, P20BD, P20BE

Some 2011-2014 F-Super duty vehicles equipped with a 6.7L Diesel engine may exhibit DTCs P20C0, P20C1, P20C2, P20BA, P20BB, P20BC, P20BD or P20BE stored in Powertrain Control Module (PCM) memory. Clear DTCs stored in PCM memory and perform Key On Engine Off (KOEO) Self-Test and Key On Engine Running (KOER) Glow Plug Monitor Self-Test. If reductant heater DTCs are present then perform Pin Point Test RH' per the Powertrain Control/Emission Diagnostics (PC/ED). If Glow Plug Control Module (GPCM) DTCs are present then perform Pin Point Test 'AF' per the (PC/ED). If no DTC's return during these tests, no further diagnosis is necessary. Use available service labor times.
