Tightening Seat Belt to Mounting Bracket

March 28, 2013

Dear Tiffin Customer,

Tiffin Motorhomes has found that some seat belt brackets on the driver's and passenger's side of certain 2013 motorhomes constructed from 11/19/2012 to 03/11/2013, could possibly have a nut that has not been tightened correctly. Enclosed with this letter are work instructions so that you can complete this repair.

After you have tightened the seat belt brackets, please complete the bottom of this letter and return it to us.

Thank you,

Tiffin Motorhomes, Inc.
