## Applicability

YEAR(S)	MODEL(S)	ADDITIONAL INFORMATION	
2011 – 2014	tC		

#### **REVISION NOTICE**

July 23, 2014 Rev1:

· Applicability has been updated to include 2014 model year tC vehicles.

Any previous printed versions of this bulletin should be discarded.

#### Introduction

Some 2011 – 2014 model year tC vehicles may exhibit a condition where water is leaking from the HVAC system. This can be caused by the HVAC drain tube becoming clogged with debris.

#### Warranty Information

OP CODE	DESCRIPTION	TIME	OFP	T1	T2
AC1300	Install Cabin Air Filter	0.4	88539-12200	64	54

#### APPLICABLE WARRANTY

- This repair is covered under the Toyota Basic Warranty. This warranty is in effect for 36 months or 36,000 miles, whichever occurs first, from the vehicle's in-service date.
- Warranty application is limited to occurrence of the specified condition described in this bulletin.

# **Drain Tube Clogged with Debris**

#### Repair Procedure

1. Verify that the HVAC drain tube is clogged with debris.

Is the HVAC drain tube clogged with debris?

- YES Continue to step 2.
- NO This bulletin does NOT apply. If no debris is found in the HVAC drain tube, diagnose
  the source of the water leak using the applicable Repair Manual.
- 2. Remove the HVAC drain tube from the HVAC box and blow it out with shop air. After the debris has been removed, reinstall the HVAC drain tube.
- 3. If the carpet around the HVAC case is wet, dry as needed.
- 4. Install the Cabin Air Filter.
  - A. Remove the glove compartment assembly.
  - B. Remove the filter door from the blower motor housing.
  - C. Remove the filter from the filter case.
  - D. Install the new filter.
- 5. Verify proper HVAC system operation.
