4. Remove and replace the LH and RH power back door actuators (Unit Assy Set, Power Back Door) with the NEW parts.

Refer to TIS, applicable model and model year Repair Manual:

 2013 RAV4: Vehicle Exterior – Door/Hatch – "Door/Hatch: Back Door Drive Unit: Removal / Installation"

 Once the new power back door actuators have been installed, confirm that the ball and socket joints (2 LH and 2 RH) are properly seated, and have approximately 1 mm of free-play as indicated in Figure 2.

To check for free-play: first push, then pull on the power back door actuator unit near each socket.

- If free-play is present, continue to step 6.
- If there is NO free-play as shown in Figure 3, the ball mount is not fully seated in the socket, and the replacement power back door actuator may have been improperly assembled. Order and install another NEW replacement power back door actuator service part, then repeat the free-play confirmation procedure.
