

# Service Bulletin

File in Section: -

Bulletin No.: PIT5223

Date: August, 2013

## PRELIMINARY INFORMATION

**Subject:** Front Driver Or Passenger Seat Cover / Cushion Loose

**Models:** 2014 Chevrolet Silverado 1500  
2014 GMC Sierra 1500

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

### Condition/Concern

Some customers may comment that the front driver's or passenger's seat cover/cushion is loose.

### Recommendation/Instructions

To correct this issue, install U-clips to help secure the cover to the seat frame. Use a U-Clip on the inboard and outboard side of the seat (2 clips per seat), as shown below - with the clip to be installed approximately 9 cm away from the right arrow seat frame location. After the U-clips are installed, crimp each clip with a pair of pliers to secure.

3606245

### Parts Information

At this time the U-Clips will be ordered through the Warranty Parts Center (WPC). Complete the WPC parts request form found below. Please use WPC part number WPC726 when ordering the clips.

**Note:** 8 clips will be shipped per request.
