

# Service Bulletin

File in Section: -

Bulletin No.: PIC5887

Date: July, 2013

## PRELIMINARY INFORMATION

**Subject:** Broken Air Suspension Compressor Mounting Bracket Bolts

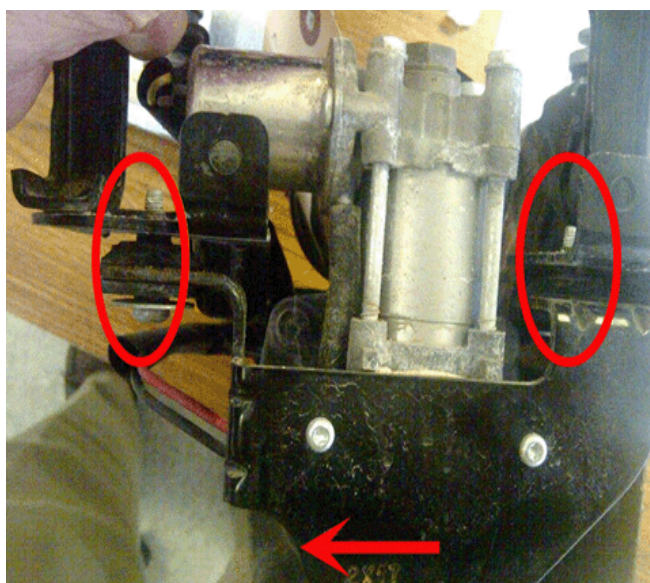

**Models:** 2013-2014 Cadillac XTS

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

### Condition/Concern

Some technicians may find one or more broken air suspension compressor mounting bracket bolts. See image below for the bolt location.

**Note:** The Red arrow represents the front of the vehicle.

3541926

### Recommendation/Instructions

These bolts are not currently serviced or available separate from the compressor assembly. Engineering is also looking to review these parts as an undisturbed assembly. If a vehicle is found with this condition, please replace the compressor assembly without disturbing the broken bolts as much as possible. The parts will be reviewed by Engineering through the normal warranty parts return process.

### Warranty Information

For vehicles repaired under warranty use:

Labor Operation	Description	Labor Time
8000490	Rear Air Spring Compressor Replacement	Use Published Labor Operation Time

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.
