# **Technical Service Bulletin**

#### 17 Instrument cluster fault stored (DTC 00003 - no or incorrect basic setting/adaptation)

17 13 40 2034550/1 July 24, 2013.

Model(s)	Year	VIN Range	Vehicle-Specific Equipment	
A3	2011-2013	All	Not Applicable	

# Condition

- DTC 00003 (Control Module no or incorrect basic setting/adaptation) is stored in the instrument cluster control module, J285 (address word 17). It may be present following a reset of the Service Reminder Interval.
- There are no functional issues with the instrument cluster.

# **Technical Background**

The instrument cluster is pre-programmed to allow a maximum service interval of 15,000 kilometers, and checks to see that this value is not exceeded. The US market uses a service interval of 10,000 miles, which is equal to 16,000 kilometers. Because this value is higher than the maximum allowed service interval, the discrepancy causes the DTC to set.

# **Production Solution**

Not applicable.

#### Service

- If there are no functional issues with the instrument cluster, disregard the DTC.
- If there are functional issues with the instrument cluster, this bulletin does not apply.
