#### 55 Creaking or knocking noises heard from front of the vehicle

55 13 33 2035797/1 November 13, 2013.

| Model(s)     | Year        | VIN Range | Vehicle-Specific Equipment |
|--------------|-------------|-----------|----------------------------|
| A4           | 2012 - 2014 | All       | Not Applicable             |
| A5           | 2012 - 2014 |           |                            |
| A5 Cabriolet | 2012 - 2014 |           |                            |
| Audi Q5      | 2012 - 2014 |           |                            |

## Condition

- The customer complains of hearing a creaking or knocking noise from the front of the vehicle when the vehicle is twisted, such as when being driven into or out of a driveway.
- The customer may describe the location of the noise source as the front suspension area.

### **Technical Background**

This type of noise may be caused by the contact between the hood height adjustment stop buffers and the lock carrier. While noises originating from the front of the vehicle may have a number of causes, the repair described below will eliminate this possible cause.

## **Production Solution**

Not applicable.

### Service

1. Apply a small piece of felt tape material (**533863288A**) to the contact surface of the hood height adjustment stop buffers as shown in the illustration (Figure 1).

**Figure 1.** Felt tape applied to contact surface of hood height adjustment stop buffer.

- 2. Check the hood adjustment and correct if necessary.
- 3. Drive the vehicle to ensure that the noises have been eliminated. Should the noises persist, continue with diagnosis to locate another possible cause.
