

## Service Bulletin

Bulletin No.:

Date: January, 2013

# PRELIMINARY INFORMATION

Subject: A/C Blows Warm Air Intermittently

#### Models: 2012-2013 Chevrolet Cruze Equipped with 1.8L Engine (RPO LUW) Built Prior to November 26, 2012

#### **Condition/Concern**

Some customers may comment that the A/C blows warm air intermittently. This condition may be most noticeable when coming to a stop or in stop and go traffic.

This condition may be caused by the A/C compressor being commanded off under certain circumstances during moderate to heavy brake apply.

#### **Recommendation/Instructions**

An updated software calibration has been released to address this concern. Reprogram the engine control module using the Service Programming System (SPS) with the latest calibrations available on TIS2WEB. Refer to the Engine Control Module Programming and Setup procedure in SI.

### Warranty Information

For vehicles repaired under warranty, use:
