

# Service Bulletin

File in Section: -

Bulletin No.: PI1057

Date: September, 2013

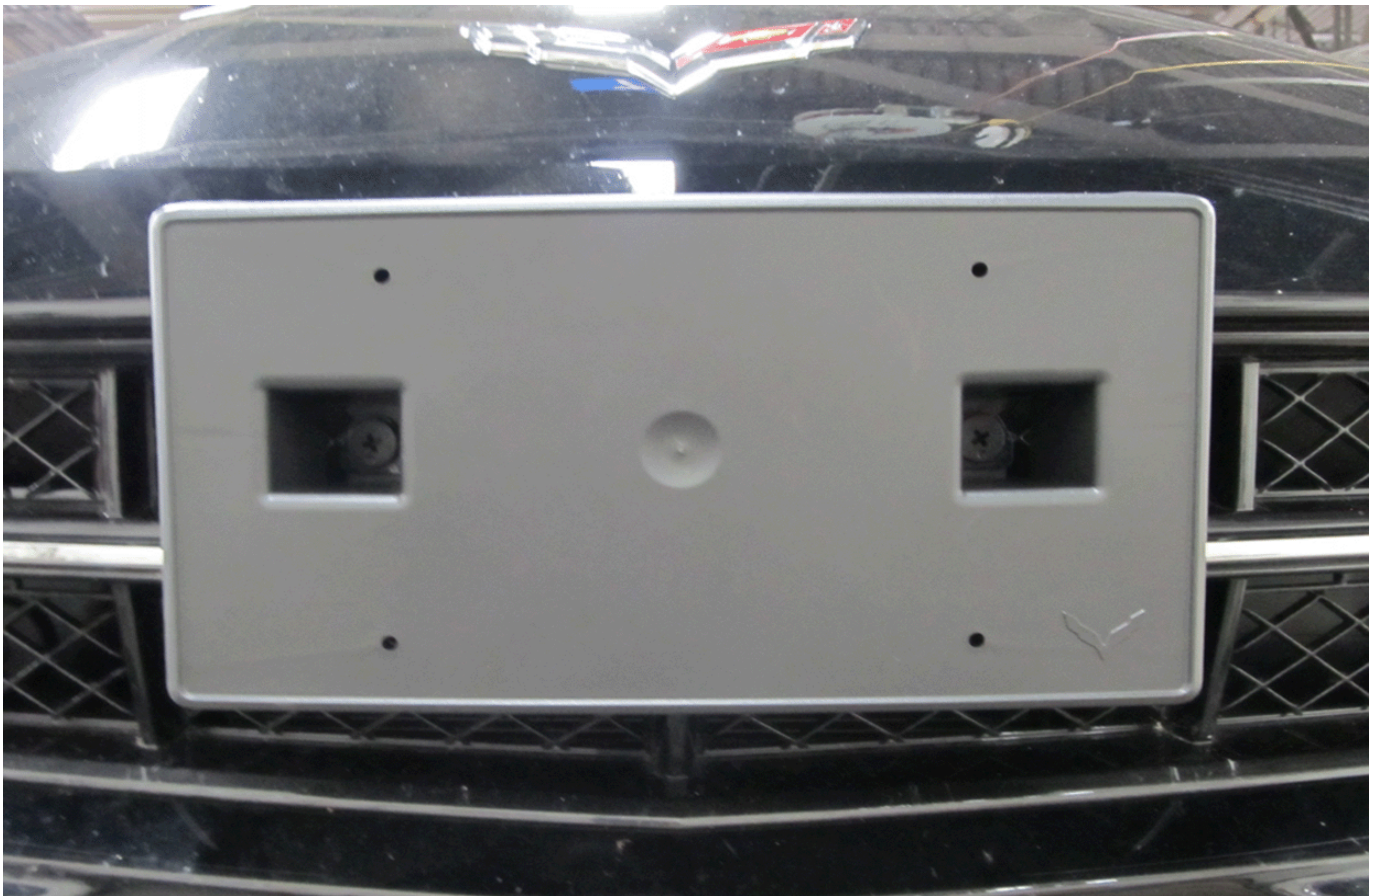

## PRELIMINARY INFORMATION

**Subject:** Information on Front Aero Cover and Front License Plate Holder

**Models:** 2014 Chevrolet Corvette

The purpose of this PI is to notify dealership personnel that the 2014 Corvette is shipped with a front aero cover and should not be confused with the license plate holder that is required in certain states or provinces. The aero cover does not meet local laws requirements for license plates. It is designed to be used to improve the aerodynamics of the vehicle. The customer should be asked if they want the cover installed at the time of delivery and should be demonstrated how to remove it and reinstall it.

**Important:** The aero cover **MUST** be removed when the vehicle is being used at performance or track events to increase airflow and increase the cooling capabilities.
