File in Section: -

Bulletin No.: PI1105

Date: November, 2013

PRELIMINARY INFORMATION

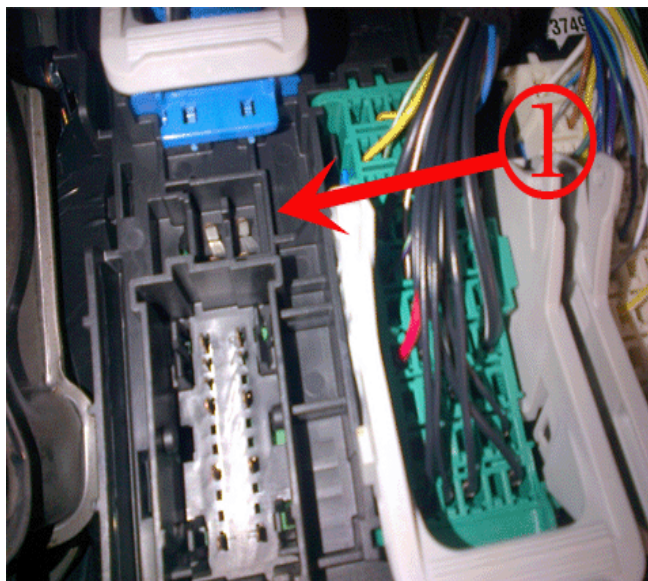

Subject: Availability of Trailer Brake Controller Harness for Adding an Aftermarket Trailer Brake Controller

Models: 2014 Chevrolet Silverado 1500
2014 GMC Sierra 1500
Equipped with RPO Z82 but without RPO JL1

The information in the PI cancels and replaces PIT5228. Please discard PIT5228.

Information on Adding an Aftermarket (Non-GM) Trailer Brake Controller

For owners who inquire how to wire in an aftermarket trailer brake controller, equipped with trailering package RPO Z82 but without integrated trailer brake control module RPO JL1, a specific harness has been made available to go from the under I/P MID-BEC to an interior mounted aftermarket trailer brake controller. The trailer brake controller harness was no longer part of the I/P harness like the previous truck models. This harness has been made to aid customers confused by the change, and wishing to use an aftermarket trailer brake controller, by providing an easier connection method.

3610482

The MID-BEC is located under the I/P to the left of the steering column. The harness connection point (1) is illustrated above. Instructions for customer installation of the harness are included in the harness packaging. For customers with 2014 Silverado / Sierra models equipped with the trailering package (RPO-Z82) but without the integrated trailer brake controller (RPO-JL1), you may provide the customer with the harness. You must verify the customer vehicle and options before ordering this part.

This information does not apply to trucks equipped with an integrated trailer brake control module (JL1).

If the customer wishes to have an aftermarket brake controller installed in their vehicle, it would be as a Customer Pay option.
