

NABI Service Bulletin No: SB-13-11-02

To: Bus Operations Managers and Supervisors
Bus Maintenance Managers and Supervisors
Bus Maintenance Personnel

From: Bill Nygaard – Director, Service

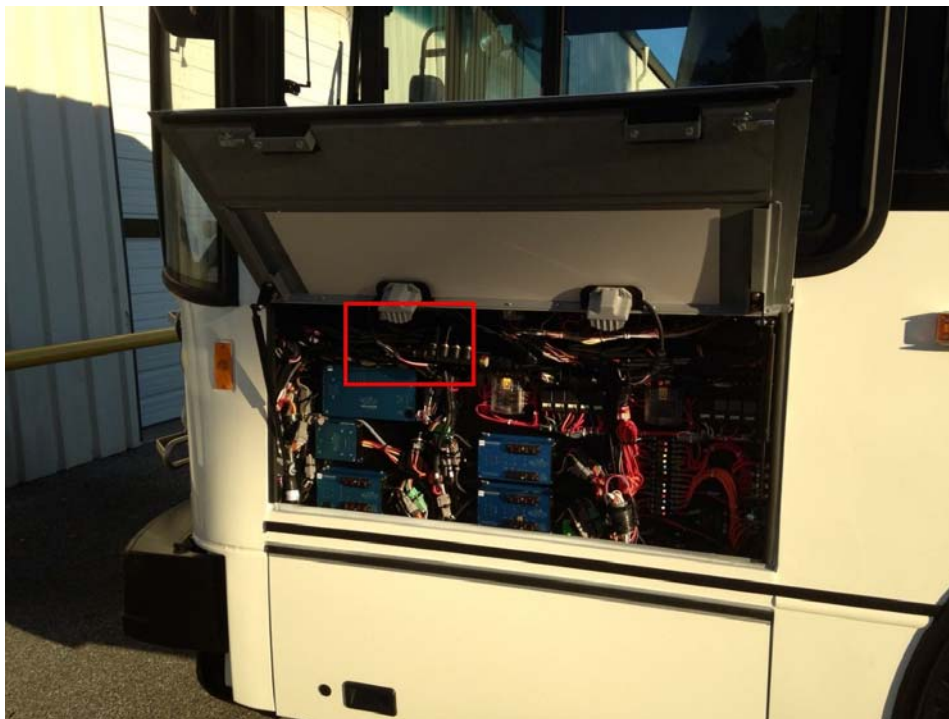

Subject: Updated ZF Transmission Shift Selector part no. 6006 341 036

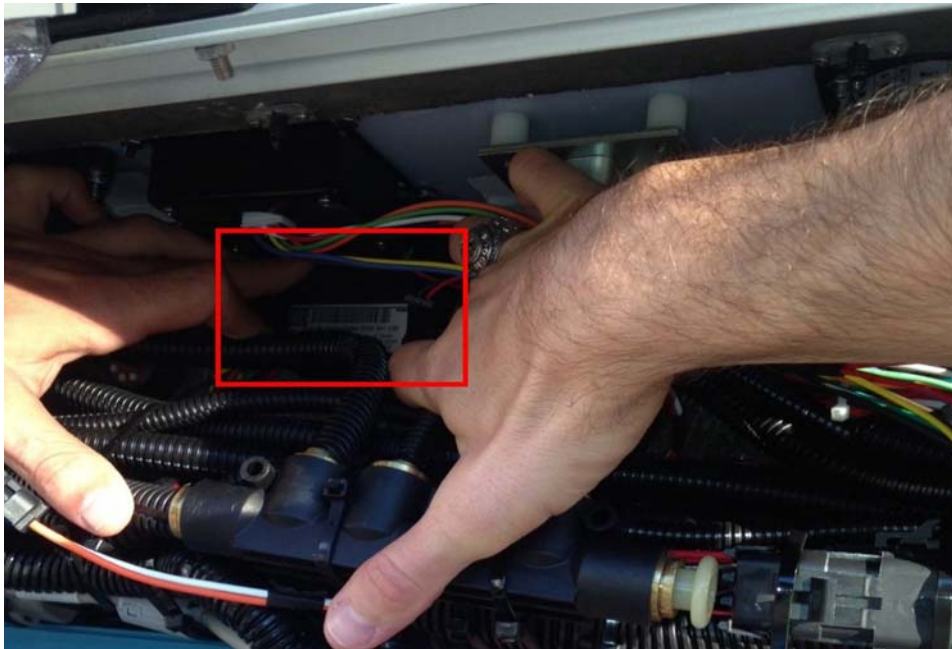

Date Issued: October 28, 2013

The purpose of this bulletin is to describe the method of identifying the updated ZF shift selector on equipped buses.

ZF has released an updated version of its Eco-Life Shift Selector with the part number 6006.341.036. While the part number has not changed, the updated shift selector is easily identifiable by the “HW” number on the part’s ID tag. The updated shift selector has the Number HW: 0004.

The shift selector is found in the compartment directly below the driver’s window. See the pictures below for the location:

Earlier versions of the shift selector will have the number HW: 0001, 0002, or 0003.

Earlier versions of this selector in stock should be returned through normal parts return processes. Shift selectors that have been removed and replaced with this updated version should be returned to the following location:

Please see work instructions for replacing this selector, attached below.
