REFERENCE NO: RF-13-12R

DATE: January 14, 2014

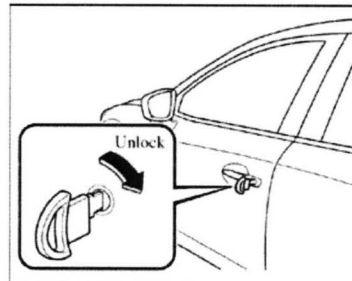

SUBJECT: 2014-15 MAZDA6, 2014 MAZDA3, 2013-15 CX-5 – THEFT-DETERRENT SYSTEM OPERATES WHEN UNLOCKING FRONT DOOR WITH MECHANICAL KEY (P/N KD45-67-5Y0G)

The operating condition of the theft-deterrent system has changed as mentioned below for vehicles produced on and after May 08, 2013. The subject vehicles are equipped with the rear Body Control Module (BCM) part number KD45-67-5Y0G or later.

New Condition: Vehicles built on and after May 8, 2013 (BCM KD45-67-5Y0G OR LATER): If the front door key cylinder is unlocked by the mechanical key while the theft-deterrent system is in the armed mode (stand-by), it is changed to the "alert" mode and the theft-deterrent system operates (alarm goes off).

Previous Condition: Vehicles built on and before May 7, 2013 (BCM KD45-67-5Y0F OR EARLIER): The theft-deterrent system is disarmed ("stand-by" mode is cancelled) if the front door key cylinder is unlocked by the mechanical key, and the alarm does not go off.

**Note:**

Rear BCM with part number KD45-67-5Y0A through KD45-67-5Y0F supersedes to KD45-67-5Y0G.

Therefore, alarm operating condition will change if the rear BCM is replaced on vehicles built on and before May 07, 2013. Customers will need to be notified of this change. Do not perform any Warranty repairs related to this change.

- The theft-deterrent system operation has been changed on 2014 Mazda6 vehicles during production. Those produced on and after May 08, 2013 are equipped with rear BCM (part number KD45-67-5Y0G or later) and use the new condition. All 2015 Mazda6 vehicles use the new condition.
- The 2014-15 CX-5 and 2014 Mazda3 vehicles (US Spec) are not impacted by this change because there is no Theft-Deterrent System option.
- The 2014-15 CX-5 and 2014 Mazda3 vehicles (Canada Spec) has a theft-deterrent system option. This change began with the start of production and use the new condition.
- The 2013 CX-5 has a theft-deterrent system option. These vehicles are equipped with Rear BCM part number KD45-67-5Y0A through KD45-67-5Y0F and use the previous condition.
