## Pardon Our Dust

You may have already noticed a change to some of our new and current vehicle platforms in ElsaPro. We have been working diligently to provide books in a new format that follows the industry standard of a system-based format over our current format. Following this industry standard of a system-based structure creates a more natural feel when searching for specific procedures and information.

**The new structure will provide the following benefits:**

- Following an industry standard will make for easier navigation
- More direct chapter-to-chapter linking

- A standardized chapter layout between all Audi vehicle platforms

While we have been able to launch these changes per platform in recent months (A3, A8), we have a few more months of transition ahead. During this time you may notice that a few “new format” books mixed with current format books as we make the transition. This is to ensure that we are able to get the latest important updates and changes to you as soon as possible as we transition platforms to the new format.

So please “pardon our dust”, per se, while we work to improve ElsaPro over the next few months.

Thank you all for your patience and understanding.

- The Service Information Team
