Automatic/Continuously Variable Transmission Replacement Precautions

Precautions

Confirm the following items:

- Both alignment pins are present on the engine block.
- ATF lines and cooler have been flushed with the appropriate ATF type.

NOTE

Continuously Variable Transmissions (CVT) require CVT fluid when flushing the cooler.

- Correct torque converter bolts and washers are used.

NOTE

Not all applications will use washers on the torque converter bolts.

- All ground straps are in the correct locations and are connected properly.
- Correct shift cable adjustment.
- Correct park neutral position switch adjustment.
- Transmission fluid level has been set properly.
- Transmission learned values have been reset and/or the compensation code has been input (if applicable) and proper initialization has been performed.
