

TECH TIP: System Setting DTC P0461A

NUMBER: TT062

MODEL: 2014MY Forte (YD)

DATE: 04/01/2014

Symptom: System setting DTC P0461 Fuel Level Sensor "A" Circuit Range Performance.

Repair: First, check the fuel sender connector to make sure it is fully seated. Then, check for backed out pins in connectors EM11, EC11, MF11 (see diagram). Also, inspect the PCM & Cluster connections. If OK, perform DTC troubleshooting per KGIS.

Note: Tech Tips are not a substitute for proper diagnosis.
