

VECTOR 6500/6600MT
FUEL HOSE SPLIT LOOM
(CTD P/N 58-00848-21)

INSTRUCTIONS

NOTE: Vector 6500/6600MT units built between S/N MAU91175644 and NAN91274679 may be missing split loom over the return fuel line. All units built in this S/N range should have this split loom installed on the hose.

1. Before performing any work on the unit, turn the Main Power Switch to the OFF position and disconnect the negative battery cable.

2. Install split loom on fuel return hose between #4 injector and T fitting.
3. Secure with ty-wrap in center of split loom per the picture below.
4. Re-connect the negative battery cable and run unit to check for proper operation.

A warranty request for parts and .2 hrs labor can be submitted, please reference R- 903 on the warranty submittal.
