

Service Bulletin

PRELIMINARY INFORMATION

Subject: Normal Condition - Unable To Disable StabiliTrak

Models: 2012-2014 Chevrolet Tahoe Police Vehicle
Equipped with RPO PPV

This PI was superseded to update Model Years. Please discard PIT5192.

The following diagnosis might be helpful if the vehicle exhibits the symptom(s) described in this PI.

Condition/Concern

A customer may comment that they are unable to disable StabiliTrak by pressing and holding the TCS/StabiliTrak button for 5 seconds as the Owner's Manual indicates.

Note: The customer will be able to turn Traction Control OFF by pressing and releasing the TCS/StabiliTrak button once.

Recommendation/Instructions

The ability to turn StabiliTrak OFF was disabled. Only Traction Control can be disabled on these vehicles.

Customer Information

Please communicate to the customer this condition is a normal operating characteristic of their vehicle. It will not impact the designed performance or reliability of the vehicle. Please share this information with the customer, including a copy of this message

Please follow this diagnostic or repair process thoroughly and complete each step. If the condition exhibited is resolved without completing every step, the remaining steps do not need to be performed.

GM bulletins are intended for use by professional technicians, NOT a "do-it-yourselfer". They are written to inform these technicians of conditions that may occur on some vehicles, or to provide information that could assist in the proper service of a vehicle. Properly trained technicians have the equipment, tools, safety instructions, and know-how to do a job properly and safely. If a condition is described, DO NOT assume that the bulletin applies to your vehicle, or that your vehicle will have that condition. See your GM dealer for information on whether your vehicle may benefit from the information.
